# CARE INSTRUCTIONS

Thank you for purchasing a custom wood countertop from Alexander Butcher Block [A Division of Urban Industrial Design]. Our goal is to create a handcrafted, one-of-a-kind custom piece that will last generations.

All hardwood creations are finished with **TIMBERGLASS™** which is a propriety finish of ABB, and cannot be found elsewhere. Timberglass Wood Finish is designed to be highly durable, crystal clear, low build coating that is resistant to water, bleach, chemicals, and scratches.

**We believe in keeping the natural look and feel of the wood.**

## Table and Wood Countertop Care

All wood creations that are finished with **TIMBERGLASS™** are sealed, waterproof, and food contact safe.

- Do not cut directly on the wood top.
- Use dish soap and water to clean up any spill or food. A wet paper towel works fine.
- Do not drag, push or pull anything on the wood surface. Unglazed pottery will scratch the wood top, using a protective pad underneath will help to avoid accidental scratching. Be cautious of anything with a sharp edge.
- Do not expose the top to excessive heat. If it's too hot to hold in your hands, use a trivet.
- **TIMBERGLASS™** is basic household chemical resistant, but solvent based chemicals such as superglue or nail polish remover will damage the finish.

## Butcher-block Countertop Care (mineral oil wax treatment)

- For the first week oil daily. After the first week, oil weekly. Then after oiling weekly for a month, oil monthly.
- Do not expose the top to excessive heat.
- Keep surfaces clean with a soft scrub and mild soap. We recommend Rubio Monocoat Universal Maintenance Soap.
- Keep any surfaces that constantly come in contact with water, oiled to prolong the life of the wood.
- If minor damage occurs to your top it can be lightly sanded and re-oiled to look new again.
- Do not use any other type of oil to treat the surface, as it could become rancid and create bacteria in the wood top.
- Check out our selection of Walrus Oil Wood Wax and Rubio Monocoat surface cleaners. Shop online and in-store.

We offer a limited lifetime warranty on most of our products (edge and end grain tops are covered for 1 year).  
Warranty includes manufacturing defects such as, glue joint failure or finish failure.  
This does not include scratches, gouges, damage or normal wear due to a lack of care and maintenance.
